ATIK

OMNItec Access Control

ATIK PRO motorised lock

Discretion and convenience accessing your home.

ATIK PRO, the discreet and adaptable motorised lock can be opened via Bluetooth, remote control, with a numeric code or remotely.

features

- Discreet installation: it is inserted inside the home without modifying the appearance of the door.
- Electronic opening and closing: Bluetooth control from a mobile or by pressing directly on the device.
- Mechanical opening and closing: a double-clutch cylinder and traditional key, and by pressing ATIK PRO from inside the home.
- Remote management: electronic keys are sent and deleted via a Gateway, with access control, usage history and battery level from anywhere with a data connection.
- Configurable self-closing: automatic closing can be activated via Rent&Pass.
- USB-C rechargeable battery: with anti-pull magnetic cable that protects the charging port.
- Up to 1500 openings per charge.
- APP available for Android and iOS.

ATIK

OMNItec Access Control

Self-closing

Configurable in two modes: by door sensor and by time programmed into the app.

Online Management

Connected to a Gateway, the lock can be managed from anywhere with an online connection.

Discreet

ATIK PRO is completely unnoticeable from outside the door.

Mechanical opening

Installed with a double-clutch cylinder, so it can be opened and closed with a traditional key.

ATIK PRO ACCESSORIES

DOOR SENSOR

Connected to ATIK PRO, for you to check the opening/closing status of the door.
